

POWER BLACK BLADES
START SHARPER, LAST LONGER

Using the purest steel, the blade is heat tempered (thru' hardened) which allows the best angles possible to be honed on the blade. The edge is genuinely sharper on the first cut, and will stay sharper, for longer.

"We regularly have tradesmen tell us KDS Black Blades last for 3 or 4 times as long as the blades they had previously used."
SAVE TIME AND MONEY!

HEAT HARDENED

- Heat Tempered (Through Hardened)
- Best Honed Angles
- Superior Composition

LONGER LIFE

- Works out cheaper
- Less down time, blade handling

SHARPER

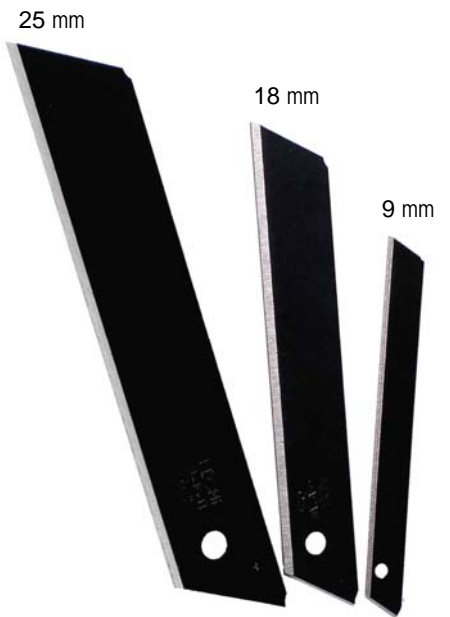

- Speeds workflow
- Safer to use
- Maximizes cutting depth
