pack = 10 pair

DESIGNED IN THE U.S.A.
WITH THE USER IN MIND

Ask someone who uses them!

Light & flexible, so comfortable you can wear them all day.

K. P. INDUSTRIES
USA

K. P. Industries is a specialist protection manufacturer, with many of their products designed and used for international defense forces. Indeed the U.S. Marines use a camouflage coloured version of the Knee Pro Flex 3, pictured above.

Other major users of the Knee Pro Flex 3 are U.S. firefighters, who particularly value the high heat rating of the pads (up to approx. 400 °F), as well as the ease of movement they provide, and of course their reliability.

Can you think of a higher recommendation than this?
